#### VALUATION OF NON-RESIDENTIAL PROPERTY

#### VALUATION: SALES COMPARISON APPROACH

- Pay no more for the property than cost of acquiring an equally acceptable substitute property
- Review recent sales (comps)
  - Sales must have occurred recently in the same market area
  - Comparable properties must be similar to the subject property

#### VALUATION: COST DEPRECIATION APPROACH

A knowledgeable purchaser will pay no more for a property than the cost of acquiring a similar site and constructing an acceptable substitute structure.

#### VALUATION: COST DEPRECIATION APPROACH

#### Formula: Cost-Depreciation Approach

Reproduction/replacement cost of the building

Less Accrued depreciation

Equals Indicated value of the building

Plus Estimated value of the site

**Equals** Indicated value of the property

#### VALUATION: COST DEPRECIATION APPROACH

Step One: Estimate Current Reproduction (Replacement) Cost

- Quantity Survey Method
- Unit in Place Method
- Comparative Unit Method

#### VALUATION: COST DEPRECIATION APPROACH

Step Two: Estimate Accrued Depreciation

Formula: **Accrued Depreciation** 

Effective Age Divided by Total economic life Multiplied by Reproduction cost new Equals

Estimated total accrued depreciation

#### VALUATION: COST DEPRECIATION APPROACH

Step Two cont'd: Estimate Accrued Depreciation

- Loss in value for any reason
- 3 Types
   Physical depreciation
   Functional obsolescence
   External obsolescence
- Land is never depreciated
- > Straight line method/age-life method

#### VALUATION: COST DEPRECIATION APPROACH

Step Three: Estimate the Value of the Site & Non-structural Improvements

Step Four: Derive the Property's Estimated Value

#### VALUATION: COST DEPRECIATION APPROACH

Example Property Value Using Cost Depreciation Estimated reproduction cost new:					
Structure	Size (sf)	Cost/sf	Replacement Cost		
Office building	1500	\$100	\$150,000		(1500 sf x \$100)
